UNIVERSITY OF PITTSBURGH
DEPARTMENT OF COMPUTER SCIENCE
50 YEARS
1966–2016
CELEBRATING OUR PAST, EMBRACING OUR FUTURE

Advances in computer and information science and engineering are providing unprecedented opportunities for research and education. James Kurose's talk will begin with an overview of the Directorate for Computer and Information Science and Engineering (CISE) activities and programs at the National Science Foundation and include a discussion of current trends that are shaping the future of the computer and information science discipline. Kurose also will discuss the opportunities as well as the challenges that lie ahead for the community and for CISE.

50TH ANNIVERSARY LECTURE SERIES

"An Expanding and Expansive View of Computing"

Friday, November 18, 2016

Frick Fine Arts Building
650 Schenley Drive
Pittsburgh, PA 15260

10:30–11 a.m.	Refreshments, Nicholas Lochoff Cloister
11 a.m.– noon	Lecture, Frick Fine Arts Auditorium

For more information about Kurose and other anniversary events, visit **cs50.pitt.edu**.

This event is free and open to the public.

The University of Pittsburgh is an affirmative action, equal opportunity institution. Published in cooperation with the Department of Communications Services. DCS109659-1016

James Kurose

is an assistant director of the National Science Foundation, where he leads the Directorate for Computer and Information Science and Engineering (CISE). CISE's mission is to uphold the nation's leadership in scientific discovery and engineering innovation through its support of fundamental research in computer and information science and engineering and transformative advances in cyberinfrastructure.

Kurose is on leave from the University of Massachusetts Amherst, where he is a Distinguished Professor in the College of Information and Computer Sciences. His research interests include network protocols and architecture, network measurement, sensor networks, multimedia communication, and modeling and performance evaluation.
